## Report of the Event:

**Objective**: To conduct a career guidance to the Biotechnology students to make aware of jobs in AI, ML and Data Science for the Biotechnology field.

### Summary:

As a part of career guidance in Industry 4.O scenario the AI=ML Data Science are emerging tools in the Biotechnology fields. In this aspect Biotechnology department has initiated the Computer Science and Biology Specialization Programme. In the need of real industry experienced expert guidance Mr.K.M.Iqbal, Administrator, AIT Aadhrose Infotech is invited as a expert trainer and making aware of job opportunities for the Biotechnologist in the field of AI ML +.

#### Outcome:

131 students from Biotechnology and 8 students from EEE were Benefitted to work on interdisciplinary.

## Snaps taken during the event conducted

Photos showing samples of career guidance on AI-ML Data Science over the Biotechnology Applications and the participants.

## Attendance

| AND THE PARTY AN |             | 98.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | SE T Superstante           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                  |             | 10        |               | Brietelle     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |        | 333
