Vote of Thanks : Dr. C. Anusuya (a) priya
Assistant professor (SS)
Department of Education

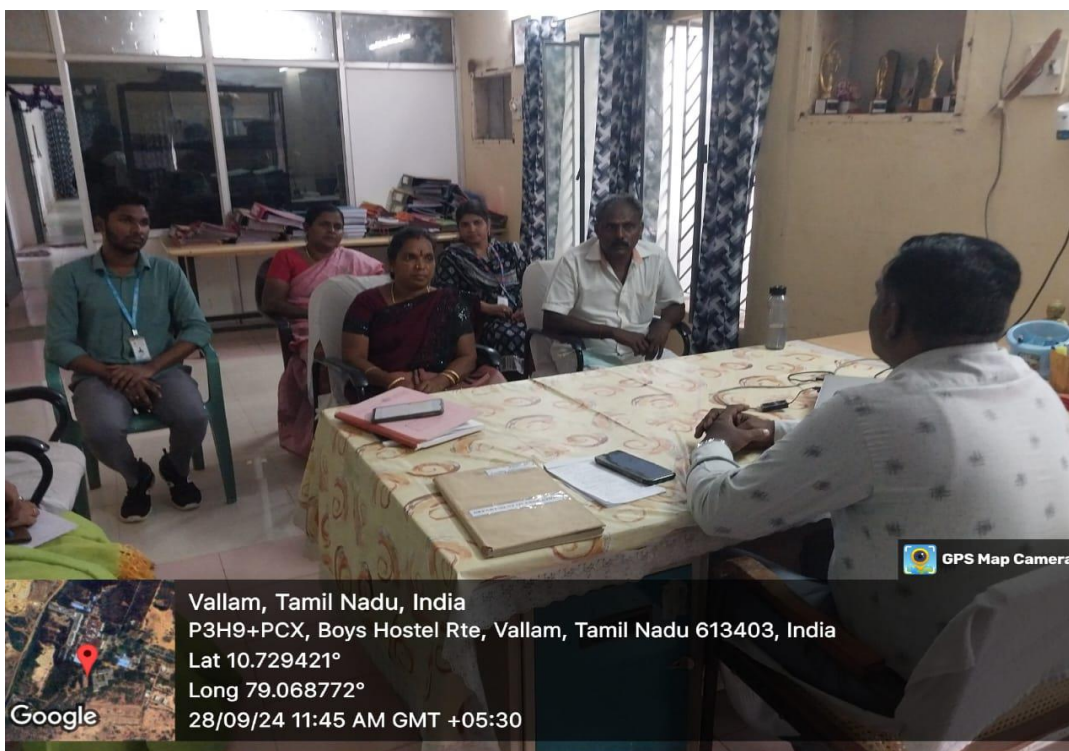

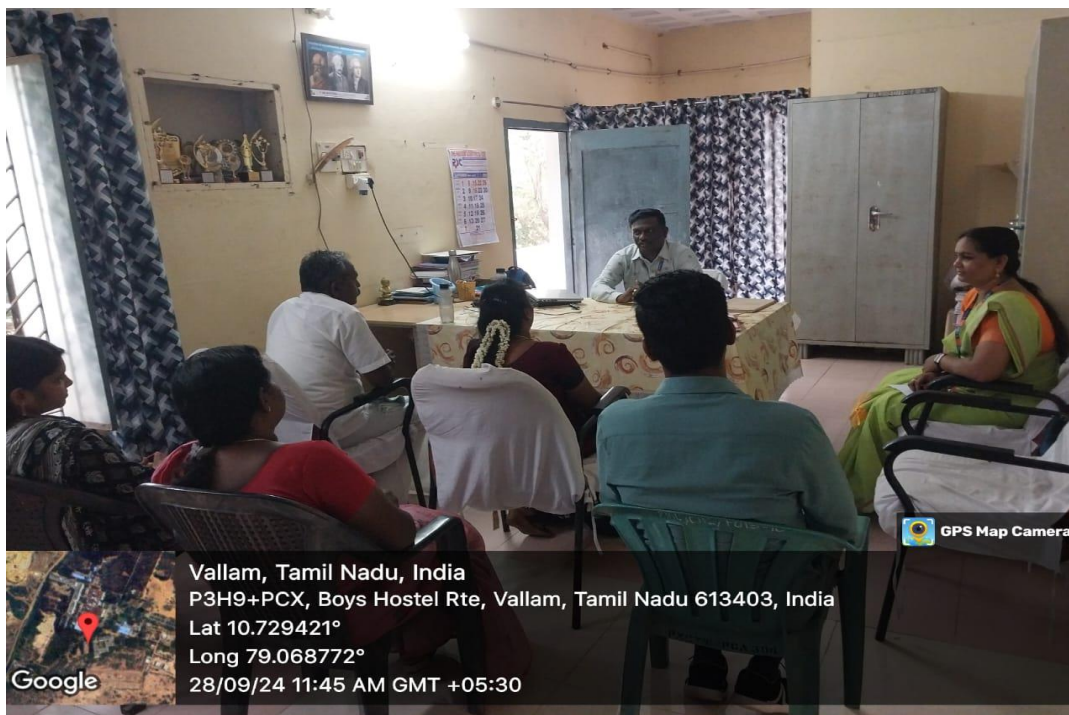

National Anthem

Report of the programme:

Here are the key points to discuss regarding Parent-Teacher Meetings (PTMs):

- **Review Student Records:** Familiarize yourself with each student's academic performance, behaviour, and any previous communications with parents.
- **Set Clear Objectives:** Define the purpose of the meeting—be it discussing academic progress, behavioural concerns, or collaborative strategies for student support.
- **Purpose and Importance:** Understand the dual role of PTMs in academic collaboration, especially in science subjects, where student engagement and understanding are critical.
- **Subject-Specific Feedback:** Focus on discussing the student's performance in science-related subjects, identifying strengths and areas for improvement, particularly in complex topics.
- **Communication Skills:** Develop skills to effectively communicate complex scientific ideas and student progress to parents who may not have a science background.
- **Behavior and Participation:** Emphasize the student's class participation, problem-solving skills, and practical lab work, which are important in a science curriculum.
- **Addressing Academic Challenges:** Learn how to explain common academic challenges in science subjects and suggest strategies for improvement, like additional resources or study techniques.
- **Parent Involvement:** Encourage parental involvement in supporting science education, suggesting ways to reinforce learning at home, such as through hands-on activities or experiments.
- **Creating a Support Plan:** Collaborate with parents to create a support plan that ensures the student's academic growth in both theoretical and practical aspects of science.
