

GREEN ENERGY**Sub themes:**

Green Energy and Sustainable energy
Renewable Energy
Bio energy
Biofuel
Solar Energy
Sustainable Built Environment
Smart City Planning

GREEN MATERIALS

Catalytic Material for Environmental Cleaning
Biocatalysts
Nanomaterials and its applications
Biomaterials
Polymeric materials and its applications
Inorganic and Organic material for Biological applications

GREEN TECHNOLOGIES AND ENVIRONMENT POLLUTION

Industrial pollution
Air pollution and control
Environmental Protection
Groundwater Issues
Soil Pollution and Treatment
Wastewater Management and Treatment
Water Pollution and Treatment
Global Environmental Issues

FOOD AND AGRICULTURE

Food Microbiology and Food Safety
Systems-based approach to food microbiology
Novel Food Processing Technologies
Food biotechnology
Food Process & Technology
Food science and nutrition
Veterinary applications
Agricultural Biotechnology
Agricultural Production and Food Safety
Agricultural waste management
Agro-industry
