ABOUT THE DEPARTMENT

Biotechnology is a unique course in Engineering which has a well synchronized curriculum, between Sciences – Biosciences and Engineering – Technology. The phenomena of Biotechnology successfully make several wide applications over Process Industries, Medical Industry, Pharmaceutical Industry, Agricultural and Food Industries, and, Energy & Environment sectors. Biotechnology is also a field of applied biology and involves living organisms encompassing modern technologies such as Genetic Engineering and Tissue Culture Technologies.

VISION

To become state of art department fostering biotechnology education and research to produce technologist, scientist and entrepreneurs for the benefit of society and environment

MISSION

- To offer programs with state of art infrastructure, learning and impart training in biotechnology.
- To develop graduates of highly skilled, with entrepreneurial, professional, ethical and socially responsibility to work in or create various biotechnology industries.
- To pursue research as well as collaborate with biotechnology, food and pharmaceutical industries, academic and R&D institutions whenever necessity arises.
- To contribute socio-economic developments through sustainable Bio technological intervention utilizing rural knowledge in health, food processing and agriculture practices.

ABOUT THE LECTURE

The lecture is aimed at enlightening and guiding the students in various career aspect so that the student can wisely choose their career path and prepare themselves accordingly.

"TECHNOLOGY BEYOND GIGABIT PASSIVE OPTICAL NETWORKS"

BY

MR. SADAYAPAN, ASSISTANT GENERAL MANAGER, BSNL, CHENNAI

The Electronics and Communication Engineering department cordially welcomes you all for the one day seminar on Li-Fi technology. The Department of Electronics and Communication Engineering (ECE) was started in October, 1988. It aims to produce quality professionals in Electronics and communication engineering to compete globally and excel by carrying out basic and applied research in emerging areas. The Department is accredited by National Board of Accreditations for the year 1998, 2001, 2004, and 2009 respectively.

GIGABIT

A gigabit is 10^9 or 1,000,000,000 bits. One gigabit (abbreviated "Gb") is equal to 1,000 megabits or 1,000,000 kilobits. It is one-eighth the size of a gigabyte (GB). Gigabits are most often used to measure data transfer rates of local networks and I/O connections.

ABOUT THE WORKSHOP

The workshop is aimed at training the students and the teaching community to design and apply process engineering principles in solving biotechnological problems. Eminent scientist from IIT and other renowned institutes will be sharing their knowledge and give hands on training in designing various Bioprocesses and its application

ABOUT THE DEPARTMENT

Biotechnology is a unique course in Engineering which has a well synchronized curriculum, between Sciences – Biosciences and Engineering – Technology. The phenomenon of Biotechnology successfully makes several wide applications over Process Industries, Medical Industry, Pharmaceutical Industry, Agricultural and Food Industries, and, Energy & Environment sectors. Biotechnology is also a field of applied biology and involves living organisms encompassing modern technologies such as Genetic Engineering and Tissue Culture Technologies.

ABOUT PMIST

Periyar Maniammai Institute of Science & Technology is proud to be a unique institution of higher learning and academic excellence. In an endeavour to fulfil the dreams of our Mentor Thanthi Periyar and Anna Maniammai, the Institution is dedicated to its societal responsibility for transforming students from different parts of India and abroad into stalwarts by igniting their hidden talents. As it is located in a rural area, the students are admitted from a wide range of calibre and by personal attention, and modern teaching methodology towards a Product/Process/ Demo / Case Study teaching, they are shaped into career oriented professionals with bright future. The Institution is making efforts to create new horizons in the arena of technical education and research. Curriculum innovation is given priority by the Institution to make the courses industry and research oriented. The dedicated and qualified faculty members routinely preach and practice for outcome based learning which leads towards an excellent academic career for the betterment of the students.

ABOUT DoMS

The Department of Management Studies was started in the year of 2007. In an effort to cater to the present day requirement for trained managerial talent, since its inception the department has been offering Master of Business Administration (MBA) with diversified specializations such as Human Resources, Marketing, Finance, Systems and Operations. The uniqueness of this MBA (Dual Specialization) programme is that the students are allowed to specialize in two areas of their choice concurrently. The faculty members of the department have rich experience both in industry and academics. Some of the faculty members have worked abroad in countries such as United States of America, Singapore, Australia and Seychelles. The department regularly organizes Workshops, Faculty Development Programmes, Seminars

and Conferences to enlighten the academic community. The faculty members of the management department are also actively involved in research. Outcome Based Education has been implemented in the academic year 2015-16. Faculty Office is situated at Technology Block - II and has spacious classrooms equipped with AV services, wireless internet connections and facilities for e-learning.

ABOUT THE CONFERENCE

India is one of the largest countries in the globe and is considered not just a potential market but is also a place with an exceptional talent pool. From the days of F.W. Taylor, the management science has seen a number of changing mores. Rapid changes are taking place in every sphere of Business, Management and Technology. New ideas, trends and technologies and its methods are emerging for addressing new issues and problems that the world is facing in the context of globalized and digitized market scenario. Thus new strategies and practices are to be identified to face these new challenges and opportunities. Interaction and exchange of ideas through this conference will certainly contribute towards generation of knowledge. It would create a platform for dissemination of business intelligence and new and useful ideas both in Management and Technology.

ABOUT PMIST

Periyar Maniammai Institute of Science & Technology is proud to be a unique institution of higher learning and academic excellence. In an endeavor to fulfill the dreams of our Mother Thiruvalluvar and Anna Maniammai, the Institute is dedicated to its social responsibility for transforming students from different parts of India and abroad into vibrant by giving them better talents. The University is committed to a green policy which includes sustainable development activities like landscaping and vegetation, water conservation, energy conservation, waste management and green building materials like fly-ash bricks. The Institute aims to achieve Zero Carbon Footprint by 2030. One of the ways identified for achieving this goal is reduction of wastage in energy and increasing the use of renewable energy. All pervasive greenery on the sprawling premises of the Institution symbolizes the institution's success in curtailing environmental pollution and promoting Eco-friendliness.

OBJECTIVES OF THE CONFERENCE

- Inspiring interactions among Scientists, Industrialists and decision makers
- Acquiring information on recent issues related to environment and climate change
- Exchange of facts about latest innovations in climate change mitigation and management
- To get exposure on the green technologies for energy recovery and conservation for sustainable environment
- Understanding of novel technologies in waste management
- Deliberating on existing policies, science, knowledge and research concerning sustainable development across the globe.
- Identify institutional innovations and best practices required to advance for sustainable environment and achieving zero carbon.
